

Ireland's first pharmacy-led Diabetes Liver Screen highlights the importance of Liver Screening for people with type 2 diabetes

The FibroScan® results of a random sample of people with type 2 diabetes who were screened for Non-Alcoholic Fatty Liver Disease (NAFLD) at Meaghers Pharmacy Group

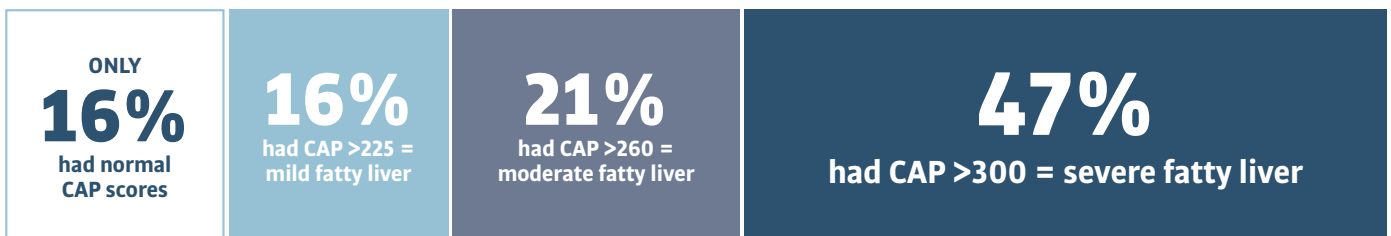

A FibroScan® Liver Assessment, 10-minute/non-invasive/pain-free scan was carried out on 62 customers (with type 2 diabetes) at four Meaghers Pharmacy Stores in Dublin

Liver Stiffness Scores

1 in 4 HAD EVIDENCE OF FIBROSIS/SCARRING OF THE LIVER

CAP Scores

EASL-EASD-EASO International Clinical Practice Guidelines recommend that for type 2 diabetes, the presence of NAFLD should be screened irrespective of liver enzyme blood tests, since type 2 diabetes people are at high risk of liver disease progression.
